

Packaging Solutions

Bubble Wrap

Innovative air retention bubble wrap that is designed to keep your load safer for longer. Air retention bubble wrap will ensure the bubbles will not go flat.

- Guaranteed air retention
- Cushioning for secured products in transit

Antislip Sheets

Stabulon Anti-Slip Sheets are renowned for protecting palletised goods from damage. Vibration during transportation often causes palletised products to slip. By simply placing Stabulon Anti-Slip sheets between the pallet layers, the products are guaranteed not to slip or cause unnecessary damage to lower layers.

- Exclusive to FPA
- Static coefficient of friction (COF) of 42 degrees
- Works on all most common surfaces, including glass
- 1000 X 1110 mm
- Prevents damage to lower levels of palletised goods

Klickseal Bags

FPA stock an extensive range of Klickseal Bags for all industrial uses. Manufactured for extra strength and durability, the FPA Klickseal Bags provide exceptional protection for storage, packaging or shipping of products. damage to lower layers.

- Also known as snap-lock, resealable or clip lock bags
- Plastic bags can be marked for production identification
- Reusable and resealable

Marking Pens

FPA stocks a range of Marking Pens. The Action Marker 44 is an industrial marker. Action Marker 44 has a special patented valve activated feed mechanism. This ensures the pen will never dry out – even if the lid is left off. The Texpen paint marker is designed to write sharp, defined, bright marks on any surface including steel, plastic, concrete, rubber and more.
