

## Battery PET Strapping Tool

### **FROMM** P329 Battery Strapping Tool

- ✓ Manual or semi automatic function
- ✓ Fast and reliable
- ✓ Simple two button operation
- ✓ Robust & durable
- ✓ Latest brushless motor and lithium ion battery technology

The P329 is Fromm's newest battery strapping tool. Packed with features including automatic cooling in the event of motor overload, brushless motors, a new strap release function to maximise strap tension on the product.

For bricks, timber, tiles, bales, aluminium, steel and a wide range of strapable products the P329 is the solution. Approximately 350 cycles per charge and fast recharging the P329 is making strapping and load restraint easier than before.

Backed up by Fromm Packaging Australia, rent or purchase options, the P329 delivers for the Australian industry.

For best results we recommend our STARstrap-Plus range of premium PET strap.

All equipment is supported by our on-site mobile service team and spare parts are readily available.

FPA Part No.	Strapping Dimensions	Strap Tension	Strap Cycles	Seal Strength	Weight	Sealing Type
