

Brite-Mark

The Brite-Mark is a quick drying, oil-based marker that withstands harsh outdoor conditions without fading, chipping or losing its opacity.

Brite-Mark® is ideal to mark inventory, assemblies, tools and finished products. It will leave clean, bright marks on metal, rubber, plastic, glass, concrete, leather, stone, wood and vinyl.

Exclusive to FROMM Packaging Australia
Brite-Mark® features a patented valve action mechanism to prevent the marker from drying out even if the cap is left off. The pen has replaceable nibs and heavy duty aluminium body to ensure the Brite-Mark® will outlast even the harshest industrial environments.
