

Plastic Corner Protectors

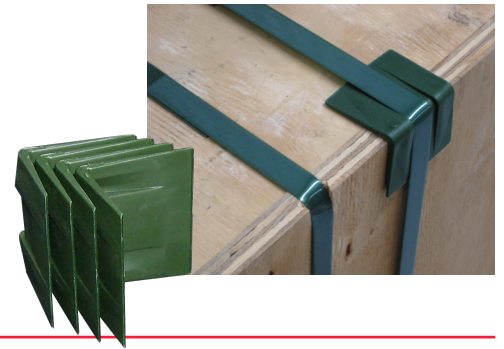

Plastic corner protectors completely eliminate cargo damage occurring from strapping. The unique design spreads the strapping force evenly and is used with steel & polyester (PET) strap.

Extensively used in the Australian timber industry to prevent valuable top layers being damaged by strap.

Cardboard Corner Protectors

Cardboard Corner Protectors will stop the edges of your cargo from being cut into by strap. Ideal for lower strap tension forces.

Long Cardboard Corner Protectors - 1170mm (pallet width) stabilise pallet loads and protect cargo from strap damage. They are quick and easy to use whilst providing a low cost solution to pallet movements during transit.

★ Features

- Made using strong plastic
- Grooved design
- Lightweight yet strong

+ Benefits

- Simple to use
- Strap won't 'jump' out of groove
- Recyclable

★ Features

- Compressed cardboard edges
- 12mm to 32mm strap width
- Easy to use and apply
- Available in brown or white
- Available in different lengths

+ Benefits

- Simple to apply
- Protects product from strap
- White are water resistant
- Customised lengths to meet your specifications
- Recyclable
