

Orbital Wrapping Film

FROMM's machine grade orbital stretch films are designed using the latest resins to offer amazing stretch whilst maintaining the pallet load integrity.

This five layer cast film can be used across the FROMM range of Orbital Semi and Fully Automatic Wrapping Machines and is often used to wrap long products such as pipes, tubes, doors, extrusions, and timber.

Capable of up to 200% stretch that represents great value for money converting one metre on the roll to 3 metres on your product.

This high-performance Orbital Wrapping Film creates an elastic memory around products to protect them whilst in storage and transport.

Comes in three widths depending on the machine model. Whilst we stock clear film, white or black films are also available.

★ Features

- Premium quality stretch film
- Up to 200% stretch
- High puncture resistance
- Transparent
- 75mm core

+ Benefits

- Low cost per pallet wrapped
- Excellent load restraint characteristics
- Elastic memory for great containment
